this pet
parents!**

Did you know...

One in three pets are at risk of getting sick (or worse) due to their pet parents not knowing which ingredients are safe to share.

At Southern Cross Pet Insurance, we're dedicated to helping pets live longer, healthier, happier lives every day. To support this, we created the Paws Off! warning symbol.

It's kind of like the don't-drink-alcohol-when-pregnant symbol or the one keeping children out of reach of dangerous objects, but for pets.

To spread the good word on which human foods are not good to feed your pets, share Paws Off! with your fellow pet parents on social media.
